

FOR IMMEDIATE RELEASE:

## **FergTech Software Revolutionizes Workers' Compensation Posting Notices**

*New software and compliance service streamlines and enhances Posting Notice workflow for Insurers*

Darien, CT – October 30, 2006 – FergTech, Inc. today announced the launch of PostingNotice.com™, a Web application that enables insurance professionals and businesses to quickly and easily produce state-required Workers' Compensation "Notice to Employees" posters ("Posting Notices"). PostingNotice.com is the first comprehensive Web-based software service for creating compliant, on-demand, and data-complete Posting Notices.

PostingNotice.com provides the ability to enter or import data about the policy, office locations, and claims processing relationship to instantly produce data-complete, state-compliant posters. "PostingNotice.com revolutionizes the way that Posting Notices are produced and distributed by printing the entire poster – form and data – using a color laser printer" said Lynne Somerville, Vice President of Marketing at FergTech. "Prior to PostingNotice.com, insurers and businesses were reliant upon an inventory of hundreds of different mail-ordered posters and applying data via stickers."

With regulations from over fifty jurisdictions in the United States for employers and insurers to comply with, PostingNotice.com is a long-awaited new product that reduces the compliance burden, operational inefficiencies, and cost associated with producing and distributing Notices/Posters. FergTech keeps PostingNotice.com software up-to-date with changing regulations while Users receive the most current version of a jurisdiction's Notice/Poster.

Access to PostingNotice.com can also be granted to the employer/insured to streamline data-entry and distribution of posters. PostingNotice.com can be integrated into an insurance company portal to provide a 24/7, on-demand, customer-service offering.

PostingNotice.com can be accessed from anywhere on the Internet at any time. FergTech also offers an outsource fulfillment option for large, multi-office/location insureds whereby FergTech's staff produces and distributes the Notices/Posters. The forthcoming PostingNotice.com Enterprise Edition is a Web service that provides integration with existing corporate systems via XML.

For more information about PostingNotice.com visit [www.PostingNotice.com](http://www.PostingNotice.com) or call (888) 627-7807.
